

LAB. 1-1 420-DW2-AS – Web Client Development (client side)

Create an html page using your first name and .html or .htm extension to name it.

- Use the DOCTYPE for HTML5. The title page should be "Web Page 1".
- Into the page, create and center the header using **h3** tag named "Course Information" and underscore it.
- The next line, enter: your first name and last name, formatted using bold and italic
- The next line, enter: ***The course number 420-DW2-AS*** in bold, italic and in color blue; use the biggest size of heading tags.
- On the next line : Create a table with the schedule of this course and the class number
- Add horizontal lines in between sections.
- Validate your HTML code with W3C web site : <https://validator.w3.org>

Send it by LEA of Omnivox.

Thank you
