

## 420-DW2-AS – Web Client Development (client side)

### Assignment 2.1 – HTML (frames)

Use the template XHTML to create the web pages, and the images to create the web site. Follow the same structure for the folders and sub-folders, and the usage of the frames.

The links in the menu web page will open the appropriate web page into the frame Content.

Compress and upload your web site by LEA of Omnivox

Thank you
